THE ARCHITECTURAL REVIEW

A Magazine of Architecture & Decoration.

The Musée Galliera, Paris: View in East Pavilion.

JUNE 1913

Caxton House. Westminster. London.

VOL. XXXIII

ONE SHILLING NET.

NO. 199

The "HUE" (Patent) ADAPTABLE Barless Fire FOR HOTELS, MANSIONS, VILLAS, AND PUBLIC BUILDINGS.

Manufactured in Hammered Metal, Armour Bright, Brass, Copper, or
Berlin Blacked Iron.

A Perfectly Safe Fire practically on the hearth,
without the necessity of specially prepared floor.

A MARVELLOUS FUEL SAVER.

ABSOLUTELY CLEAN IN USE.

The special feature of this Fire is its
adaptability to existing stoves,
the basket portion being portable and cast
specially to fit. It will at once be seen
that the installation of "HUE" Fires does
not involve inconvenience or a large expense.

ASK TO SEE TESTIMONIALS RECEIVED.

Illustrated Booklets giving full details sent
free upon application.

Old-fashioned Stove fitted with Hue Fire and giving greatest
satisfaction (see Testimonial).

CARRON "Segmental" Suites

THE rapid increase in the number of "ideal" homes has created a consequent demand for fireplaces in harmony.

For this style of house, the trend is for a truly artistic grate at a moderate figure, and in no make are these features more happily combined than in Carron Company's series of "Segmental" Suites. These firegrates are simple and dignified, have a touch of the antique, which gives distinction to a room, and have received commendation from the leading members of the profession. Equally appropriate for the cottage, tenement, or villa residence.

No. 5 "SEGMENTAL" SUITE.

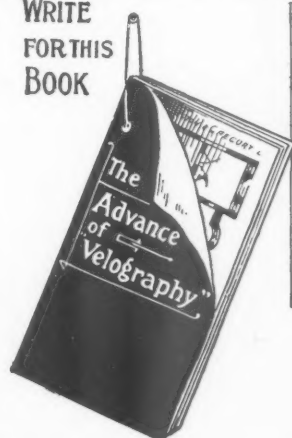

New Architects' Catalogue.

CARRON Company have just issued a 276-page Catalogue, specially prepared for the Architectural profession. Although devoted largely to Firegrates of all periods, other sections of "Carron" productions are represented. A copy of this volume will be sent you, gratis and post paid, on request.

By Appointment,
Ironfounders
to H.M. The King.

CARRON COMPANY CARRON, STIRLINGSHERE, and Phoenix Foundry, Sheffield.

ANNOUNCEMENTS.

THE ARCHITECTURAL REVIEW is published on the 10th of each month.

All Correspondence relating to Editorial Matters should be addressed to the Editorial Secretary, R. RANDAL PHILLIPS, Caxton House, Westminster.

The Editor will be pleased to give his careful consideration to any articles, photographs, or drawings which may be sent with a view to publication, and the utmost care will be taken of them; but the Editor cannot hold himself responsible for any loss or damage except in the case of material which has been accepted or specially commissioned.

All articles and illustrations should bear the name and address of the sender, and postage should be sent to cover their return if submitted in the ordinary way.

The Editor disclaims responsibility for statements made or opinions expressed in any article to which the author's name is appended; the responsibility for such statements or opinions resting with the author.

Payments will be made about the 15th of every month for all matter appearing in the issue for the preceding month.

PREPAID SUBSCRIPTION RATES.

UNITED KINGDOM	10/6 per annum, post free.
CANADA	\$3.50 " " "

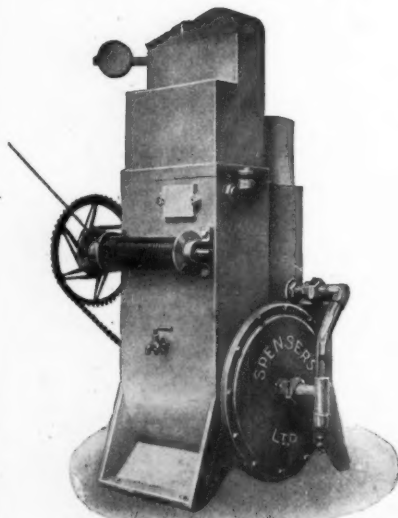

UNITED STATES	\$5 per annum, post free.
ELSEWHERE ABROAD	20/- " " "

Cheques and Postal Orders should be made payable to "TECHNICAL JOURNALS 1902, LTD.," and crossed London County and Westminster Bank, Temple Bar Branch.

SPENSERS' IDEAL LIGHTING

Consulting Engineer:

H. ELWELL-SMITH, A.M.I.E.E., A.M.I.M.E.

SPENSERS' WEIGHT-DRIVEN MODEL.
Perfect in Construction—Absolutely reliable—All working parts visible and immediately accessible.

SPENSERS' Petrol Gas Generators are scientifically designed and mechanically perfect in every respect.

They are the outcome of over EIGHT YEARS' practical experience, and many hundreds of Installations have been carried out in all parts of the world.

Built principally of cast Iron and pure Copper, from 10 lights upwards, and guaranteed.

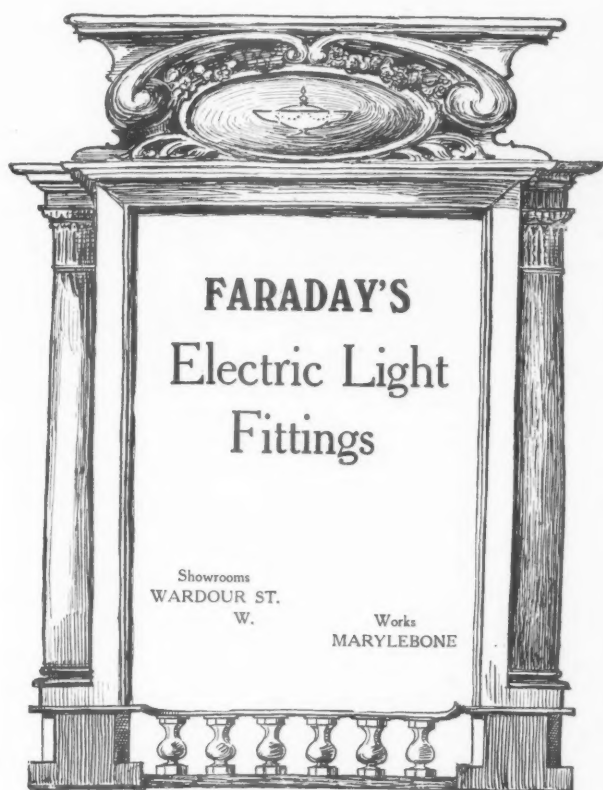

It is significant that although SPENSERS often replace other systems, their IDEAL GENERATORS have not in one single instance been replaced.

We keep a large staff of experienced fitters and carry out complete Installations without interference with existing decorations.

Artistic Fittings a Specialty, designed when required to harmonise with any period of architecture. A large selection on view in our Showrooms.

Estimates and Booklets free.

If it's a matter of
SLATING
make a point of
using
Old Delabole
Green-Grey Slates

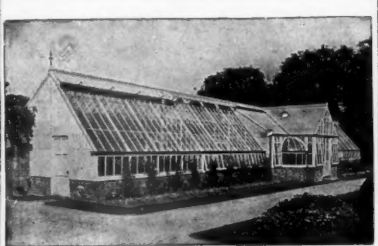

from the famous Delabole Quarries in Cornwall. The matter of roofing being of the first importance why not use Slates from the quarries from which this material has been obtained for more than 350 years—the same kind that were drawn from the Delabole Quarries in Queen Anne's time and used on a house at Launceston. The roof of this house is still in excellent condition after two centuries of storm, sun, and wind. Old Delabole Green-grey Slates are artistic as well as sound and lasting. In random sizes they form most effective graduated roofing, appealing strongly to modern ideas. Old Delabole Green and Red Slates used on the same roof are a fine combination.

Steel Office Fittings

Secure in every way!

Roll Top Desks, Counters, Tables, Grilles, Doors, Partitions, Shelving, Lockers—all these may be had in Steel finished in plain colour enamels or grained to match any hard wood. Think of the security afforded!

Nothing to Catch Fire—Nothing to Burn.

Art Metal Steel Furniture & Fittings

are already installed in many offices and public buildings. They have many advantages over wood. Apart from the extra security, they give maximum storage capacity for space available. Moreover, they save time and labour because books, papers, and documents need no longer be transferred to and from the strong room night and morning.

Art Metal Furniture and Fittings are

durable and clean, and are not affected by climatic conditions. Complete equipments supplied for Banks, Offices, Libraries, Clubs, Hotels, &c.

N.B.—Illustration at right shows how the Steel Shelving can be *adjusted to any desired height*. At left, Steel Desks, with Steel Drawers and Roller Book Shelves, in LONDON OFFICES.

URALITE ASBESTONE

In TILES for ROOFS,
In SHEETS for PARTITIONS & CEILINGS.

*As used by the L.C.C., H.M. Office of Works, Admiralty, War Office,
Metropolitan Asylums Board, and the leading Architects.*

BEST FOR ROOFS,

BECAUSE

- (1) It is very light, and a far lighter superstructure can therefore be used.
- (2) There is no loss by breakage either in transit or fixing, as is the case with ordinary slate.

BEST FOR PARTITIONS AND CEILINGS,

BECAUSE

- (1) It is fireproof, vermin-proof, and damp-proof.
- (2) It is rapidly fixed to a wood or steel framing.
- (3) It is dry when it is put up, and therefore papering and painting can be proceeded with immediately.

FULL PARTICULARS and ILLUSTRATED BOOKLET will be sent FREE on application.

"NATIONAL" AIR-GAS

The **ONLY** Light worth considering.

Many petrol gas machines can only use a light petrol, which is extravagant, expensive, and comparatively weak in gas-making elements. The up-to-date **"NATIONAL"** Machine uses heavy petrol only, which is richer in gas-making constituents, and is sold at less than half the market price of the lighter spirit. Therefore **"NATIONAL"** gas is more than 50 % cheaper than petrol gases from light spirit, and cheaper than any other illuminant.

Cost of 300 lights of 50 c.p. each for one hour.

"National" Air-Gas from	
"National" Petrol -	1.11

and the Heaped Fire Company Ltd.,
10, Mortimer Street,
London, W.

Those whose business it is to plan and erect modern dwellings are realising more and more that one of the greatest recommendations for a modern house is that it should be equipped for the ready installation of gas appliances.'

Gas cookers, gas fires, gas water-heaters, and, since the introduction of the incandescent inverted burner, gas lights are in such growing demand nowadays that they should be borne in mind at the outset of building operations.

Probable positions of the appliances should be considered so that necessary points are readily available. If this is done it becomes an easy and convenient matter to suit clients without after disturbance.

Scagliola Marble

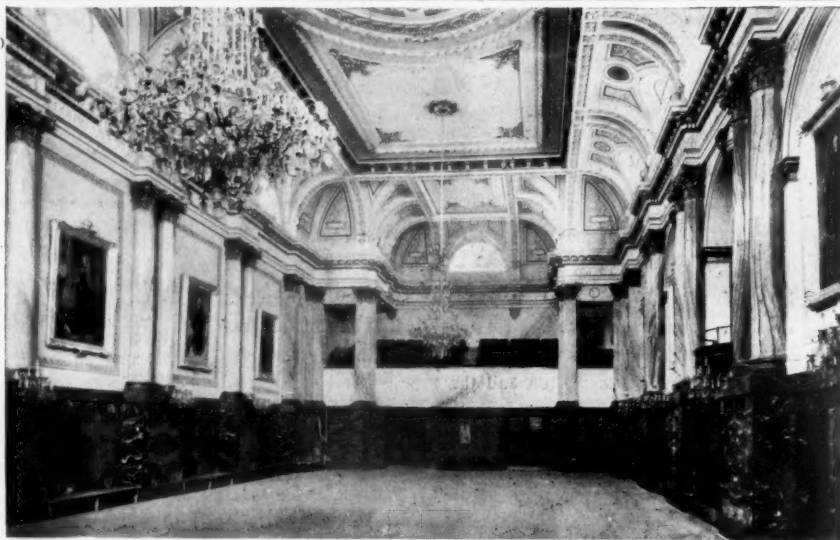

BY SPECIAL APPOINTMENT

An old Italian process, revived in the early part of the Sixteenth Century by Guido Sassi; is not a surface decoration, but a thoroughly artistic material. It was largely used by the Florentines in some of their most elaborate works, and was introduced into this country by Mr. J. Wyatt about 1750. It has been manufactured by this firm for the last 85 years, and fixed in many of the most important buildings in the Kingdom.

TO HIS MAJESTY.

Recent English Domestic Architecture.

Edited by MERVYN E. MACARTNEY, B.A., F.S.A., F.R.I.B.A.

English Domestic Work is of acknowledged supremacy in the domain of Architecture. These Special Issues give a magnificent collection of the work of the best architects of the day, and are of the greatest value, not only to architects and builders, but also to those having estates to develop, and others who are interested in house-building.

3 Vols. Price 7/6 each nett. Post free inland.

Practical Notes for Architectural Draughtsmen.

By A. W. S. CROSS, M.A., F.R.I.B.A., AND A. E. MUNBY, M.A., F.R.I.B.A.

Gives in most convenient form for use on the drawing-board examples with concise rules, explanations, and dimensions for preparing Designs, Perspectives, and Working Drawings for Classical Architecture with rapidity and precision. It contains a mass of valuable information with carefully drawn examples. How to draw

"The Orders" correctly with the smallest possible amount of study and work is shown by the invaluable drawings and data given in this publication.

 $12\frac{3}{4} \times 9 \text{ in.}$

Price 15/- nett, post free inland, including Portfolio.

Short Chronological History of British Architecture.

This publication, by the manner of its arrangement and illustration, presents the whole field of British Architecture as a *coup d'œil*, and enables the several periods to be examined individually, and, at the same time, to be studied one with another for purposes of comparison. The letterpress, moreover, written by acknowledged authorities, sets forth in brief order the entire chronological development, following the succeeding phases of architectural art, and giving those essential facts which are necessary to a proper estimate of the whole.

Price 10/- nett, post free inland.

10 x 14 in.

Standard Details.

25 large Plates (24 x 17½ in.), forming with Portfolio Vol. I. of "Standard Examples of Architectural Details."

The object of this publication is to give, on a large scale, examples of architectural details which are representative of their several periods. The drawings have been executed with great care, and are reproduced to such a size that every detail of the work can be closely studied. Included on the plates are photographic reproductions. In this way each example is completely represented. In the present portfolio the plates include typical examples of interior and exterior details—chiefly of the period of the English Renaissance.

Price 15/- nett, post free inland.

13 x 9 in.

 $24\frac{1}{2} \times 18$ in

English Ecclesiastical Architecture.

English Ecclesiastical Architecture has great traditions, and it is fortunate that there should exist a school of men among English architects who possess the ability to produce work of the highest character. The ecclesiastical buildings of the prominent exponents of the Gothic Revival—Pugin, Scott, Butterfield, and the rest—have already been fully illustrated, but never before has there been brought together a representative series of photographs of the recent work of English church architects. Examples of the best modern church work are included, and the volume is fully representative of what is being done by the chief architects of the present day, including buildings of Renaissance character as well as Gothic. The illustrations are reproduced to a large size.

Price 10/6 nett, post free inland.

Orders should be sent to The Manager, TECHNICAL JOURNALS, Ltd., Caxton House, Westminster, S.W.

Owners of Land, Building Sites, Country Estates, and all connected with House Property should obtain a copy of

SPECIFICATION

No. 15, 1913.

The recognised standard authority on the many subjects connected with the Architectural and Building profession. Every Section has been written by an accredited authority, and the annual revision comprises the contributions of qualified specialists of recognised standing in their several departments.

Price 3/6 nett. Postage 6d. extra inland.
Over 500 pages, strongly bound. Size, 12 $\frac{3}{4}$ in. \times 8 $\frac{3}{4}$ in.

TECHNICAL JOURNALS, LTD., CAXTON HOUSE, WESTMINSTER, S.W.

Recent English Domestic Architecture

Examples Selected by
Mervyn E. Macartney,
B.A., F.S.A., F.R.I.B.A.

DOMESTIC ARCHITECTURE is of vast interest, not only to English Architects, but also to Architects all over the world.

English houses have so long established themselves in the forefront of domestic architecture that the distinctive qualities which they exhibit need not be enlarged upon; no houses excel them for quiet dignity, appropriate treatment, and charm of effect.

English architects have enjoyed a unique legacy in the mansions of the Tudor and Renaissance periods, and the delightful character of these examples has been a never-failing inspiration for modern work.

The gathering together of the most notable recent work into three large volumes, illustrated by photographs and drawings, is not only an interesting but a most valuable undertaking, the collection being of particular value by reason of the careful selection exercised in the choice of the examples, and the representation of these by means of special photographs reproduced to a large size. While interesting to the general public—or at least to that section of the public which takes an interest in architecture—the volumes are in no sense to be considered as mere picture-books. They treat the subject of English Domestic Architecture in a dignified, serious, and useful manner; in all cases plans being included. Attention has been given not only to the general design, but also to the decorative details of houses, and to the subject of garden design.

Vols. I. & III. out of print. Vols. II., IV., & V. Price 7/6 each nett.
(Over 200 pages each. Size, 13 in. \times 8 $\frac{3}{4}$ in.)

**THE KAHN SYSTEM OF
REINFORCED CONCRETE**
TRUSSED CONCRETE STEEL CO, LTD.

**KAHN BARS
RIB BARS
HY-RIB**

THE
NATIONAL GALLERY,
TRAFALGAR SQUARE,
LONDON, S.W.

The
estimated value
of the contents
of this Building
has been put
as high as
£200,000,000.

The Kahn System was specified for the New Galleries, and is being used for the reconstruction of the floors and roofs of the Old Galleries, the whole of the building shown above having been reconstructed on the Kahn System.

The Roof Construction
of one of the New
Galleries. This design
has also been applied
to the reconstruction
of the old Building
on Trafalgar Square.

The change from timber floors and roofs to reinforced concrete construction is well worth attention for town and country mansion work, and the reconstruction of old and historical mansions from a fire prevention point of view is a sound business proposition; especially where the contents are of great value and irreparable. The annual toll of country seats is, in the main, preventable. The question of finish to floors and formation of ceilings presents no difficulty where the Kahn System is used.

THE TRUSSED CONCRETE STEEL COMPANY, LTD.,
61, CAXTON HOUSE, WESTMINSTER.
